STEPHENSON'S
ROCKET

STEPHENSON'S ROCKET EVENT HIRE

Stephenson's Rocket will return to Manchester for the first time in over 180 years from the 25 September 2018.

Rocket was built to run on the Liverpool and Manchester Railway, the world's first inter-city passenger railway line. In 1829, Rocket won the Rainhill Trials, which was a competition to decide on the best mode of transport for the railway.

The technology applied to the design of Rocket was soon extended across the entire railway network, paving the way for the modern rail network and shaping the course of the history.

Seize this once-in-a-lifetime opportunity to dine next to an iconic symbol of the world's oldest surviving passenger railway, the terminus of the Liverpool and Manchester Railway which is now home to the museum.
