Welcome to the Science and Industry Museum, a place full of amazing objects and world changing ideas.

The museum is located on the site of the oldest surviving passenger railway station, in the heart of the world's first industrial city, where science met industry and the modern world began.

A long-term, multi-million-pound restoration programme is underway to carry out crucial restoration work and reveal new spaces for visitors to enjoy, play and learn in.

This means that some of our historic buildings are closed right now, including the Power Hall and the 1830 Station, but there's still lots to do on your visit.

To find out more about what's on, pick up a Today's Events guide at the info desk.
